

# TWOGIE INU WHITEPAPER

# INTRODUCTION

Twoge is an innovative deflationary token aiming to revolutionize Defi, building its own Twoge Blockchain, introducing a multi-chain swap (TwogeSwap) across Binance, Ethereum, Cronos and Polygon.

By giving up 100% of token ownership to a strong and vibrant community, the liquidity pool will be permanently locked, with no “wallet blacklisting mechanism” to allow free trading and the safest. We are the safest bet for long and short term investors in the meme category.

# TWOGEPWERS AND ABILITIES

**Twogeswap:** is conceptualized to address the lack of user-friendly tools across EVM-compatible networks in DeFi. Twogeswap will be built on a decentralized AMM system leveraging liquidity pools powered by users to enable seamless crypto trades across multiple chains.

**Twoge Blockchain:** Twoge's proof-of-stake blockchain, hard forked from the Ethereum blockchain. This blockchain will offer cheaper gas fees than Ethereum and faster transactions than the Ethereum block. It consists of Kusari mainnet and testnet, and the Kusari Explorer.

**Twogeverse:** Enter the Twogeverse virtual reality Metaverse. When the user arrives they will find themselves on the TwogeverseDisc. From there, the user will be able to explore all things #TwogeStyle and find directories of establishments on other discs in the Twogeverse.

**Twoge 3FA Wallet:** Three Factor Authentication (3FA) Wallet will require a code entered from their authenticator app on the phone before any transactions can occur out of the user's walle

# TOKENOMIC

What is the tokenomics  
and tax?

2% Redistribution

5% Marketing

3% Liquidity

Total Supply:

1,000,000,000,000,000
